PCT/DE2004/001082

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-8	YES
	Claims		NO
Inventive step (IS)	Claims		YES
	Claims	1-8	NO
Industrial applicability (IA)	Claims	1-8	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

1. Reference is made to the following documents:

D1: US-B-6 170 535 (SADR CHANGIZE ET AL),
9 January 2001 (2001-01-09)

D2: US-A-5 916 945 (FERNAGUT F. ET AL),
29 June 1999 (1999-06-29)

2. The application fails to meet the requirements of PCT Article 33(1) because the subject matter of claim 1 does not involve an inventive step (PCT Article 33(3)).

Document D1 discloses an extrusion blow moulded pipe made of plastic, more particularly a fuel filler pipe for a fuel tank, consisting of a multilayer coextrudate and having opening portions at each end, each with a flange and/or a face for welding to connecting pieces. Although D1 makes no mention of calibrations, it is generally known to calibrate pipes (see, for example, document D2), and a person skilled in the art could therefore be expected to carry out a calibration procedure on the pipe known from D1 according to his needs or requirements, without exercising inventive skill.
